

Posting on A CTS Group, Inc. DBA Dynasel USA Website

Software QA Analyst

A CTS Group, Inc. DBA Dynasel USA is seeking a qualified professional to fill the position of Software QA Analyst based in Santa Clara, California. Responsibilities: Design, develop and modify software systems, using scientific analysis and mathematical models to predict and measure outcomes and consequences of design. Identify, analyze and document defects with program function, output, user interface or content. Analyze information to determine, recommend, and plan installation of a new system or modification of an existing system. Determine user needs and software requirements to determine feasibility of design within time and cost constraints. Store, retrieve, and manipulate data for analysis of system capabilities and requirements. Document test procedures to reproduce defects and ensure compliance with industry standards. Research and provide recommendations to developers on software usability and emerging technologies. Prepare reports or correspondence concerning project specifications, activities, or status. Document software defects using bug tracking system and report defects to concerned parties. Position requires 50% national travel.

Position requires Master's degree or foreign equivalent degree in Software Development, Information Technology, Science or a related field.
